

• 3 WAYS TO MAKE YOUR TECHNOLOGY WORKPLACE SAFER

Understand the top dangers of your workplace and what you can do to avoid them.

- Occupational illness and injuries cost businesses **\$170 billion each year**.
- Studies show that comfortable, well-ventilated and well-lit, safe workplaces increase productivity as much as **16 percent** and job satisfaction as much as **24 percent**.
- In 2014, companies faced environmental fines of **\$100 million** as well as **\$9.7 billion** in environmental corrective actions.

LOOKING INSIDE AT THE COMMON WORKPLACE HAZARDS

As technology companies continue to prosper locally and expand globally, employees feel the pains of overlooked environment, health, and safety issues that crop up in an ever-changing workplace. It is the EHS manager's job to ensure employees are safe and comfortable in a protected office environment. The graphic below illustrates workplace hazards that could lead to injury or incident in technology offices.

PUT YOUR PEOPLE FIRST. PROTECT YOUR MOST IMPORTANT ASSETS.

People are your company's most important asset. Keep them happy and comfortable in your office by following these three tips:

- 1 KNOW-HOW:** Make your workplace safe, which results in productive and comfortable employees. Be an expert in the challenges that come with growth.
- 2 HELPING HANDS:** Equip yourself with the right resources to fully implement and support your EHS programs. Bring in support to act as an extension of internal teams.
- 3 PREVENT LARGER ISSUES:** Foster an open and collaborative culture of safety in the workplace. Deliver people-first safety policies to protect your employees and your brand reputation, allowing you to focus on growth.
