Experience Summary

Mark Mathiowetz is a Senior Consultant and the Mid-Continent Regional Manager with over 28 years of business and P&L management experience. Mark's business-first focus has helped clients identify potential risks and opportunities through the modeling and management of large environmental liability transfer portfolios. Further specialties include: financial management and expense recovery, transaction support assistance and liability identification, and remedial system design. In addition, he developed a team of professionals that recovered in excess of \$300MM for Antea Group clients from petroleum storage tank reimbursement funds throughout the U.S. Mark's business skills and environmental acumen allow him to focus on both sustainable solutions and the financial benefit, ensuring clients achieve their long-term business goals and recognize measurable, lasting impact to their bottom line.

Related Projects

- Manages an environmental liability transfer portfolio of 270 sites in five states with an operating budget in excess of \$100MM. In the first 5 years of the program, approximately 70 % of the initial sites have received No Further Action (NFA) letters from the respective agencies under Mark's direction.
- Assisted in the development of client accounting for sustainability models allowing clients to better quantify sustainability practices and enhance their long term profitability.
- Managed a large team of reimbursement specialist across the United States that provide reimbursement program management, reimbursement claim processing, database development and tracking for petroleum clients. This team recovered over \$300,000,000 for Antea Group Clients.
- Developed processes that allowed for historical reimbursement recovery for a number of major oil clients, though this process Antea Group identified previously missed reimbursement opportunities, recovered necessary documentation, and submitted reimbursement claims for the recovery of over \$100,000,000 for our clients across the United States.

Curriculum Vitae

Mark Mathiowetz

- Program Director for LAUST sites in Green River, Powell, Evanston, Buffalo, Upper Platte Valley, Platte County, Laramie, Rock Springs and Kemmerer Wyoming for the Wyoming Department of Environmental Quality. Accountabilities include overall client satisfaction, financial management, quality control, project completion, and staffing.
- Managed over 100 petroleum release sites in the Rocky Mountain Region. These sites included all phases of project involvement including: tank removal, site investigation, preparation of corrective action plans, remedial system pilot studies, remedial system design, construction and operation and maintenance.
- Completed remedial pilot study evaluations at approximately 75 UST sites throughout Rocky Mountain Region. The pilot studies included groundwater pump and treatment, air sparging, biological remediation and soil vapor extraction testing. Evaluated the data from the pilot studies to determine the most feasible long-term solution at these sites, including the type of equipment and design necessary to optimize each option.
- Supervised the installation of remediation equipment and conducted system activation at approximately 30 UST sites through out the Rocky Mountain Region. These included soil vapor extraction, groundwater pump and treatment, vacuum enhanced groundwater recovery, off-gas treatment and air sparging. Obtained the necessary permits for water and off-gas discharges.
- Developed sample protocol and monitoring programs for greater than 200 groundwater contamination sites in the Rocky Mountain Region.
- Provided tankage inventory review for several UST storage and dispensing systems.
- Managed 30 active remediation sites in the Rocky Mountain region. Directed construction activities, provided oversight for remedial system operation and maintenance, conducted remedial system trouble shooting training, acted as contact person for all field trouble shooting activities. These systems included: soil vapor extraction, air sparging, groundwater pump and treatment, biological remediation, off gas treatment and combinations of these systems.
- Coordinated the excavation and land farming or off site disposal of petroleum contaminated soil at approximately 20 UST sites in the Rocky Mountain Region.
- Coordinated the disposal and incineration of hazardous waste found at several UST sites in the Rocky Mountain Region.
- Managed the investigation and pilot testing at a petroleum pipeline release site in Montana covering a 5-acre area. Installed an insitu bioventing system.
