### Experience Summary

Elizabeth Aramowicz Smith, a Consultant, has more than 23 years of experience with technology companies, chemical manufactures, transportation parts suppliers, life science corporations, garment manufacturers, paper industry, colleges and universities, and research and development laboratories for the automotive industries. She specializes in global EHS compliance management systems development; EHS policy analysis; international EHS compliance inspections and results trend analysis; EHS training development and presentation; and management and coordination of all aspects of environmental compliance projects.

Elizabeth is skilled at leading and motivating diverse teams of professionals, communicating / liaising with clients (government and industry), consultant firms and the public. She is also skilled at identifying and developing business opportunities, strategy and operations plans development, EHS risk assessment and management. She is part of the development teams for the Antea Group's solutions of the Global RegSupport Helpdesk and the EHS Flex gap analysis.

### Related Projects

- Managing the EHS content generation project for 104 countries focusing on health, safety, security, and environmental rules and regulations, for use in consulting practices and applicability review by clients. This includes overseeing 56 EHS consultants around the world for technical content, global consistency, quality control, deliverables, schedule, and budget.
- Managed over 365 international and domestic EHS compliance audits in over 48 countries for private clients in the chemical manufacturing, equipment production, auto parts, beverage and bottling and pharmaceutical testing and production industries since 2007. Responsibilities included developing EHS protocols and legal registers, coordinating the audit logistics with the client and auditors, providing technical review of audit generated materials, manipulating collected data for input into iEHS, and reporting development and trends analysis for resource allocation and program development for corporate offices.

# Curriculum Vitae

## **Alizabeth Aramowicz Smith**

- Provides corporate leadership to specialty chemical and transportation part suppliers on the development of a global auto supplier company EHS program including: identifying lagging and leading business indicators, development of global EHS compliance calendars, Behavior Based Safety (BBS) observation, and global incident reporting using the Antea Group iEHS mobile applications; developing protocol and strategy for self and third party EHS compliance and specialty audits (e.g., machine guarding, ergonomics, ISO) for corrective action consulting and development of trends analysis to better lead the corporate EHS program growth.
- Developed the global technical EHS guidance and model implementation documents for a variety of clients, including life sciences, manufacturing, food production, and specialty chemical companies. This includes development of template language that translate for global use, sensitivity to global EHS regulations, and guidance on how to implement the document at the facility level.
- Co-developed and implemented Antea Group's Global RegSupport Helpdesk and ESH Flex solutions for global clients.
- Managed the development of annual EHS training for chemical manufacturer's international EHS Managers, safety training for the company's subcontractors globally, and domestic training packages for on-line training courses.
- Manage of EHS Coordinated the development and implementation of an EHS self-audit program for colleges and universities, chemical manufacture, US Air Force, US Postal Service, and National Oceanic and Atmospheric Administration.
- Developed model compliance programs to implement EHS requirements and corporate standards for colleges and universities, worldwide life sciences companies, chemical manufactures, and global food manufacturers.
- Developed EHS programs and model documentation, such as Spill Prevention Control and Countermeasure Plans, Chemical Hygiene Plans, HAZCOM Plans, Waste Management Plans, Storm Water Pollution Prevention Plans, Bloodborne Pathogen Plans, etc. for a variety of domestic clients to ensure compliance and help facilities streamline corporate documents to become site-specific.
- Developed and managed hazardous waste, universal wastes, hazardous materials, air emissions, PCBs, lead-based paint, underground and above ground tanks, natural resources, wastewater and storm water discharges and OSHA programs for university facility management and laboratories. Training required permits, development of management plans, and training personnel, recording, reporting and analyzing compliance data.
- Provided project supervision, analyzed soil and water quality data, and completed technical reports for property transfers (Phase 1, Phase 2, and Environmental Impact Statements), tank excavations, remedial investigations, compliance agreements, and permit monitoring.
- Developed a sustainable Master Plan, which required providing detailed trend analysis on resource consumption to direct sustainable efforts and utility deregulations contracting decisions.
- Performed environmental compliance audits of Department of Defense (DOD), Food and Drug Administration (FDA), chemical manufacturing, global food manufacturer, and automotive supplier, and research and development laboratories in New York, Arizona, Arkansas, Michigan, California, New Mexico, Texas, North Carolina, South Carolina, Missouri, Nebraska, Kentucky Florida, Nevada, Utah, Georgia, Tennessee, North Dakota, South Dakota, Virginia, District of Columbia, Central America, and Europe. Audits included client coordination, site reconnaissance, permit and environmental file reviews against protocols for federal/state/local regulations and
