

Is Resources-as-a-Service right for you?

Defining key scenarios where RaaS delivers business value

At Antea®Group, we understand the staffing challenges that EHS departments face. Some jobs are temporary and don't require the addition of full-time staff, or sometimes it's difficult to fill a role that requires a high level of experience. Whatever your resourcing needs are, we can provide a flexible, custom solution – whether it's embedding staff onsite, partnering remotely, or a combination of both.

Does your company find themselves falling behind on EHS-related work due to one of the following scenarios?

Business strategy of hiring only to your core business

Headcount freeze

Layoffs or attrition but EHS workload remains

Short-term technical specialty needed

Fill-in prior to in-house hire

Travel freeze but "eyes and ears" needed at remote locations

Temporary overload of existing EHS staff

Cost-effective strategy to complete a book of work

Then RaaS may be right for you!

Contact us to learn more about the value RaaS can bring to your EHS team.
